ARISTON
COMFORT ALWAYS ON

**HYPER SPEED,
INSTANT COMFORT.**

**NEW COMPACT
AURES RANGE**
ELECTRIC INSTANTANEOUS WATER HEATERS

**WHAT DOES COMFORT
MEAN TO YOU?**

ARISTON TAKES UP THE CHALLENGE OF BRINGING US THE COMFORT WE ALL DESIRE.

In this fast-growing world, we all desire a place to belong. **A place to feel settled and comfortable**, where each of us, at some point in our lives, can make new decisions to move on.

We want to keep this feeling along our lives, while we set up our first home, or when we nest and start a family, growing and aging together. In any case, we always hope for our beloved ones to stay nice and cosy, providing them with the warmth they deserve.

We all have our own idea of comfort: this might come in different forms, but it is what we all yearn for.

NO MATTER WHAT'S YOUR IDEA OF COMFORT. OUR CHALLENGE IS TO GIVE EVERYONE THE COMFORT THEY NEED. EVEN WHERE IT SEEMS HARD OR IMPOSSIBLE TO FIND.

Ariston always takes action to introduce **new ways of bringing comfort to every corner of the world:** finding where comfort hasn't been fully reached and innovating methods for adjusting the concept of comfort to people's lives.

The background of the advertisement features a dark blue, almost black, space filled with vibrant, glowing blue light trails. These trails are composed of numerous thin, parallel lines that create a sense of rapid movement and energy. In the lower-left quadrant, there are several concentric, glowing blue circles that resemble a tunnel or a vortex, drawing the viewer's eye towards the center. The overall aesthetic is futuristic and high-tech, emphasizing speed and efficiency.

THE FASTEST WAY TO PROVIDE UNLIMITED HOT WATER WHENEVER AND WHEREVER YOU WANT.

Compact, efficient, very quick and **elegant**, the new Aures electric instantaneous water heaters are the ideal solution for having **hot water immediately ready** right after you open the tap.

No more time and energy waste while waiting for hot water, sparing you from shivering in the shower.

Choose the right model for your needs and get ready to **enjoy the pleasure of instant hot water**.

Quality, efficiency and **reliability** at all times are ensured by the unique **Ariston expertise**.

INSTANT HEATING TECHNOLOGY ENTER A NEW ERA OF INSTANT COMFORT.

Aures electric instant water heater uses electricity to **instantly deliver hot water at the desired temperature** thanks to its compact 0.4 l tank equipped with a **powerful heating element** which heats water as soon as it flows through the unit.

Aures is **available in a wide range of power options** (from 2kW to 36 kW) to satisfy any need. With Aures Pro, the water temperature is kept stable at the desired level due to the action of the **high-performing thermostatic technology**.

ENERGY CLASS A THE ULTIMATE ENERGY EFFICIENT SOLUTION.

Aures is the most efficient way to provide hot water at the point of use. The whole Aures range boasts ErP energy class A, achieving **top level of energy efficiency** in the electric water heating segment.

All the electricity taken from the electric network **is converted** into the necessary amount of hot water needed by the user. **The water is not pre-heated** and it is not stocked in a tank: an effective approach to **eliminate heat loss and reduce energy consumption**.

TOTAL SAFETY SYSTEM THE PEACE OF MIND YOU'RE LONGING FOR.

The **double pole Earth Leakage Circuit Breaker (ELCB)** prevents electric shocks, integrating with a total safety device system that **avoids the damage of the product**. If a dangerous voltage is detected, the device will interrupt the electrical circuit as a safety measure. Thanks to the excellent protection of the product against the ingress of water, **Aures Slim single point can be placed inside the shower space**.

HIGH QUALITY MATERIALS MADE TO LAST FOR LONGER.

Aures range is manufactured with high quality components and materials ensuring **long life and top performance over time**. Aures Pro features a **stainless-steel canister** that guarantees long-lasting quality and good resistance to high water pressure.

QUALITY PROTOCOL INDUSTRY 4.0 100% CHECKED AND TESTED BY ARISTON.

Ariston uses **the most advanced production system** to monitor and control production across all phases. **Every single product is carefully and strictly tested** for quality, efficiency and energy saving.

ITALIAN DESIGN A STATEMENT OF YOUR CLASS AND STYLE.

Designed by the Italian designer Umberto Palermo, Aures range adds a **sleek aesthetic** look to your home with a **compact body** made of high quality materials, **modern and elegant shapes, stylish finishes**, and a **new high-tech interface**.

HI-TECH DISPLAY

The **frontal interface** characterized by a high-tech display and soft touch buttons is **very easy to use**. Aures Pro **error codes are shown on the display** to immediately recognize the issue and solve it.

COMPACT SIZE SIMPLE TO INSTALL, EASY TO MAINTAIN.

Aures' compact size allows **simple installation also in narrow spaces** like the shower box or under the sink. **Easy maintenance and quick replacement** of the internal components are ensured.

AURES PRO

NEW

ELECTRIC INSTANTANEOUS WATER HEATER

ADVANCED PERFORMANCE

- / High power to satisfy the needs of the whole house.
- / Multi point can supply more water points at the same time.
- / Electronic thermostat ensures an increase of energy saving.

FULL COMFORT

- / Hot water and constant temperature right when you need them, in every condition and regardless of any external factor (water flow, water's original temperature).
- / Full touch interface to interact and set easily the product.
- / Easy to maintain with frontal access to all internal components.

EVERLASTING QUALITY

- / Electronic thermostat prevents scalding thanks to anti-overheating features.
- / Stainless steel tank.

EXCLUSIVE DESIGN

- / Premium "Ariston Wave" Italian Design.
- / Frontal metal elegant anthracite cover.
- / External caps glossy anthracite plastic cover.
- / Space saving thanks to compact sizes.

RANGE Horizontal 18, 24, 27, 36 kW

DIMENSIONS (H-D-W) 356 x 138 x 526 mm
36 kW: 356 x 138 x 636 mm
